TAKE YOUR E-LIQUID BUSINESS TO THE NEXT LEVEL. >

Welcome to Xyfil Ltd.

Based in Preston, Xyfil are one of the leading UK e-liquid manufacturers supporting brands worldwide as their businesses develop. We provide end-to-end manufacturing services, helping you develop your brand at every stage from bespoke flavour development to the design and production of your e-liquids.

Our white label manufacturing service provides a fuss-free way for you to start or expand your e-liquid company. All our popular white label flavours are fully compliant with the Tobacco Products Directive (TPD) and are pre-notified, meaning we can provide them quickly at a price you'll love.

Discovery

Whether you're a new entrant to the market or an established player, all good relationships begin with a clear understanding. Before we start the e-liquid manufacturing process, we will begin with a discovery meeting. Taking this time up front allows us to deliver the results you want to see, as quickly and efficiently as possible. As a new business, we'll use the discovery meeting to capture your vision, goals and strategy.

For established players, the discovery meeting will allow us to discuss the motivators and drivers for your flavour development, co-packing or compliance project and be sure to give you precisely what you're looking for, in the most efficient way possible.

Manufacturing

Our end-to-end manufacturing service ensures your brand is supported at every stage of development. From bespoke flavour development, all the way through to brand design and production, we are here to ensure you create a stand-out e-liquid.

We work with some of the best e-liquid brands across the world, developing and manufacturing e-liquids blended from the finest ingredients.

Bespoke Flavour Development

Flavours are at the heart of our business and we can place them at the heart of yours too.

We have a team of three flavourists with almost 20 years of combined experience within the industry. Many of the flavours that have come from our labs have won awards, several of which have won awards in the UK, US and on continental Europe for multiple consecutive years.

There are a lot of 'good' flavours on the market but these days, 'good' isn't good enough. You need the extraordinary, and that's where we thrive.

A good marketing and distribution strategy will get you far in this industry, but unless your flavours have the 'wow' factor, sales numbers can, and frequently do, tumble fast. Don't take that risk – come to the best team in the industry.

MAKING THE COMPLEX, SIMPLE. >

E-liquid Safety and Regulatory Compliance is essential for any successful e-liquid brand or business. We provide a variety of regulatory, analytical and TPD services to ensure your e-liquids and hardware meet legal requirements.

Branding and Design

Once we have developed the flavours for your e-liquid range or product launch, you have the option to work with our expert team of graphic designers to bring your brand to life. The bottle, the box, the label, and the special finishing options are all features of this design process.

Vape shops have many brands competing for attention and this is why a strong design is so important. Our creative team have developed the branding for some of the top, award-winning e-liquid brands in the UK and wider markets.

As well as helping develop new brands, our creative team are also on hand to advise existing e-liquid companies on how to successfully rebrand to drive awareness and engagement.

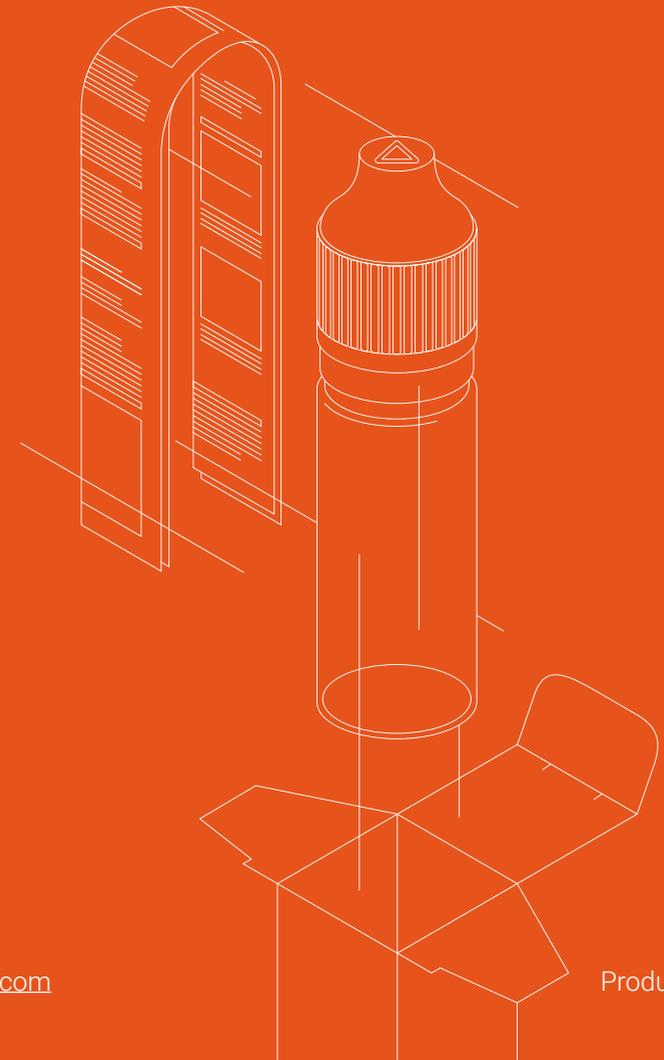

BRINGING YOUR E-LIQUID BRAND TO LIFE. >

Production

Production is the moment where your e-liquid vision becomes reality. At the heart of our manufacturing operation is the production laboratory.

We blend, bottle and produce entire e-liquid lines within our 30,000 sq ft manufacturing facility. Our e-liquid manufacturing equipment is of the highest calibre, our pumping and weighing equipment is to pharmaceutical standards and our processes are ISO 9001 accredited, and annually audited.

Distribution

Whether you're an overseas customer breaking the UK market, or a new brand looking to make traction, everyone can use a helping hand. Xyfil offers My Vapery as a distribution channel for all of our customers.

THE SYNERGY BETWEEN
YOUR SUCCESS AND OURS
BEGINS HERE. >
